

The Landaco range of **FAST** fit Foam Markers

A complete Unit

The **Landmark** Foam Marker is supplied as a complete kit, which includes the tank and frame, diaphragm compressor in sealed plastic box, wiring harnesses, foam generators, 2x20 metres of sheathed capillary line, mounting brackets and hardware. A parts diagram and assembly instructions make assembly easy and operation of your new Landmark a pleasure.

Single Sided Kit

Controlled foam quality

Foam Generators are positioned at the boom tip to ensure the best quality foam, and are supplied by air and liquid fed through 8mm and 10mm lines.

On the ECON SS24 the Blob rate is controlled from a needle valve on the tank cap.

On all other models the rate is controlled from a needle valve on the compressor.

Applications

Crop Sprayers, Fertiliser Spreaders, Trash Seeders.

At night, the foam makes navigation easy and takes the guess work out judging distance.

ECON SS 24Ltr

Cost Effective

Eliminate overlap and wastage. An overlap of only half a metre can waste a hectares worth of chemical in 20 hectares.

Your **Landmark** Foam Marker will quickly pay for itself.

Remote controller

Models SS24, DS24 and DS60 come with a remote switch controller which allows switching from the tractor cabin between "left" and "right" marker.

The Economy model ECON SS24 has the switch on the compressor.
