## Trailing Belt Spreader

**The very popular Agrispread trailing belt spreaders offer the benefit of being able to spread a much wider range of products, with unbeatable performance and advantages.**

There are three main models available in this range. They are the TS2500, TS3000 and TS4000.

The Landaco Agrispread range will effectively spread lime, gypsum, urea, super, cow manure, chicken litter, pig manure, compost, map, dap, dolomite and seeds.

The LANDACO Agrispread features a wide 800mm PVC conveyor, which eliminates bridging of materials and our proven positive belt drive system, with no chains or moving parts exposed to the elements. The mechanical ground drive system is sealed, grease packed and enclosed to keep it clean and operational. The high/low range ground drive reduction is hydraulically engaged or disengaged from the tractor cabin.

The LANDACO Agrispread has heavy-duty twin 700mm diameter hydraulic spinners with high efficiency casting vanes as standard, for the fullest and most even spreading. The recommended spinner RPM range is 750-850 rpm.

30 years of spreader innovation has led to the Landaco Agrispread trailing range. An industry leader in terms of strength, size and safety and The proof is in the finish. Compare the 10 Landaco advantages with any other trailing spreader, and you'll see the difference and know a Landaco spreader, are a better spreader.

### The Agrispread TS2500, TS3000 & TS4000 features include:

- Wide 800mm Conveyor
- Twin 700mm Spinners
- Finger Tip Tractor Controlled Hydraulic Spinners
- Heavy Duty Ground Drive System
- Adjustable and Removable Spinner Deck
- Heavy Duty Park jack & View window
- 6 Tonne Solid BPW Rated Axle
- Landaco Quick-set Calibration Software
- 2 Pak Quality Coating & Non-corrosive Carry Rollers
- 12 Month Warranty

### AGRISPREAD TRAILING RANGE

Agrispread	TS2500	TS3000	TS4000
Hopper Capacity Kg's	2500	3000	4000
Hopper Capacity Ltr	2200	2800	3500
Overall Dimensions LxWxH (cm)	480x235x150	480x235x180	480x235x195
Fill Opening LxW (cm)	250x190	250x190	250x190
<b>Working Spread Widths</b>			
-Std. 700mm MPS	6-34	6-34	6-34
Max. Spinner Speed	850rpm	850rpm	850rpm

The spinner assembly is adjustable & removable, allowing the spreader to be used for feeding grain, laying gravel on roads, distributing material in rows or simply shifting material from A to B.

An optional drip line applicator can easily be fitted to deliver material below the drip line in vineyards or orchards.

With the ground drive Landaco Agri-spread Linkage belt spreader, selecting an application rate and calibration is made easy with the Agri-spread excel based quick set calibration software. The products density and the desired spread width are entered including a door height and displayed is your application rate per hectare. To know a products density often the supplier will have a product information sheet available or Landaco have available a product density scale tool.

#### All LANDACO Agrispread trailing belt spreaders feature:

- **Chassis:** The heavy duty chassis is made from RHS steel to ensure long life and withstand the roughest treatment.
- **Drive Roller:** Crowned & heavy shaft for continuous drive.
- **Tracking Rollers:** Self cleaning and automatically maintains correct working line for conveyor.
- **Conveyor:** Top quality PVC, 800mm continuous belt.
- **Twin Spinners:** Large 700mm spinners with advance designed vanes to give the widest, most even spreading pattern possible.
- **Conveyor Drive:** Fully enclosed chain reduction.
- **Rear Door:** Full width 700mm x 350mm with a quick set door latch for fast setting and accurate free flow of material.
- **Removable Spinner Assembly:** Allows controlled dumping, trail laying and the attachment of additional equipment such as augers, side banding conveyors & drip-line attachments.
- **Visibility:** The Agrispread range is fitted with viewing window to increase operator awareness of low material level.
- **Options:** A range of options are available including Hydraulic Over-Drive, Drip Line Applicators, Side Chutes, Tarpaulin and Ridge Pole, Foam Markers (single or double), Seed and Trace Element Dispensers, Electronic Field and Material Monitors and Electronic Weight Scales.
- **Warranty:** All Agrispread spreaders are covered by a 12 month (1 year) warranty.

## “THE SPREADING ADVANTAGE”

Spread what you want – where you want – when you want

# Landaco Agrispread Trailing Spreaders

## FEATURES

Strong & Stylish Design.....	Spreading made easy
Proven Belt Feed System.....	Spread a range of materials evenly
Ground Drive.....	Proportional application
Adjustable spinner speeds.....	Vary spread widths to suit requirements
Single quick-set door.....	Simple to select application rate
Wide spread for all materials.....	Less fuel, less passes, less compaction

## BENEFITS

## Options

	<b>BIN EXTENSION KITS</b>		<b>VARIABLE RATE AND TOUCH SCREEN CONTROLLERS</b>
	<b>CLEATED PVC CONVEYOR</b>		<b>INTEGRATED SEED &amp; TRACE ELEMENT DISPENSER</b>
	<b>FLOATATION TYRES</b>		<b>DRIP-LINE SPREADING ATTACHMENT</b>
	<b>TARPAULIN - HOPPER COVERS</b>		

Solid hardwearing construction enables the LANDACO Agrispread to carry loads over rough terrain and allows high operating speeds.

The LANDACO Agrispread is the ideal low maintenance trailing belt spreader designed to spread the full range of materials available to all facets of farming, from the lightest granulates, powders and manures to the heavier gypsum and damp lime.

Experience counts – with over thirty years in the spreader design and manufacturing industry, Landaco is a front runner in Australian design and innovation on a world platform. You will receive continual professional results with the easy-to-operate **LANDACO Agrispread**.

The belt spreader every farmer can afford to have on their farm.
